[1] A dead end is a page whose chain stops. **red**: the first link points at a page that does not exist, shown as a red link on Wikipedia. **redirect**: the first link is a redirect that never resolves to an article: a redirect loop, a chain of more than 10 redirects, or a redirect into another namespace. **none**: the page exists but has no qualifying first link, typically a disambiguation page whose links are italicized, or a page whose lead is nothing but templates.
